Contents of Volume 22

No. 1

C.J. Hurst, W.H. Benton and K.A. McClellan (U.S.A.)
Suppression of viral replication by guanidine: a comparison of human adenoviruses and enteroviruses (JVM 00743) 1

K.J. Richardson, A.B. Margolin and C.B. Gerba (U.S.A.)
A novel method for liberating viral nucleic acid for assay of water samples with cDNA probes (JVM 00744) 13

M. Badia and E. Querol (Spain)
Detection and purification of bovine herpesvirus 1 glycoproteins by lectin affinity (JVM 00745) 23

W. Braun and C. Schacherer (F.R.G.)
Rapid (24 h) neutralization assay for the detection of antibodies to human cytomegalovirus using a monoclonal antibody to an HCMV early nuclear protein (JVM 00746) 31

S.A. Agha, J.C. Coleman, S. Selwyn, L.A. Mahmoud and A.M. Abd-Elaal (U.K., Egypt)
Combined use of sonication and monoclonal antibodies for the detection of early and late cytomegalovirus antigens in centrifugation cultures (JVM 00749) 41

N. Crofts, W. Maskill and I.D. Gust (Australia)
Evaluation of enzyme-linked immunosorbent assays: a method of data analysis (JVM 99750) 51

W.J. Maskill, N. Crofts, E. Waldman, D.S. Healey, T.S. Howard, C. Silvester and I.D. Gust (Australia)
An evaluation of competitive and second generation ELISA screening tests for antibody to HIV (JVM 00751) 67

J.H. Hughes and J.F. Sheridan (U.S.A.)
Enhanced production of poxvirus vectors by high speed rolling (JVM 00748) 75

M.J. Cardosa, T.P. Hooi and N.S. Shaari
Development of a dot enzyme immunoassay for dengue 3: a sensitive method for the detection of antidengue antibodies (JVM 00754) 81

J. Kruining, P.G.H. Mulder and R.A. Heijtink (The Netherlands)
Immune response to HBsAg differently interpreted by RIA and EIA (JVM 00755) 89

F.H. van Tiel, C.A. Kraaijeveld, J. Baller, T. Harmsen, T.A.M. Oosterlaken and H. Snippe (The Netherlands)
Enzyme immunoassay of mumps virus in cell culture with peroxidase-labelled virus specific monoclonal antibodies and its application for determination of antibodies (JVM 00752) 99

D. Filipenko, T. Hobman, I. MacDonald and S. Gillam (Canada)
In situ detection of rubella RNA and antigens in cultured cells (JVM 00753) 109

No. 2, 3

B. Ørskov Lindhardt, C. Pedersen, K. Ulrich and P. Kusk (Denmark)
A comparison of three methods for detection of antibodies against the major core protein p24 of human immunodeficiency virus (JVM 00747) 119

S. Kageyama, O. Yamada, S.-S. Mohammad, S. Hama, N. Hattori, M. Asanaka, E. Nakayama, T. Matsumoto, F. Higuchi, T. Kawatani and T. Kurimura (Japan)
An improved method for the detection of HIV antigen in the blood of carriers (JVM 00787) 125

I. Hirsch, J. Reischig, O. Benada, D. Bartsch, B. Břicháček, L. Boguszaková and V. Vonka (Czeshoslovakia)
Epstein-Barr virus nuclear antigen type 1 binding: electron microscopy (JVM 00786) 133

T. Mathiesen, V.-A. Sundqvist, J. Albert, E. Ohlsson and B. Wahren (Sweden)
Acid hydrolysis of serum samples to increase detection of HIV antigen (JVM 00788) 143

R.E. Fulton, J.P. Wong, Y.M. Siddiqui and M.-S. Tso (Canada)
Sensitive fluorogenic enzyme immunoassay on nitrocellulose membranes for quantitation of virus (JVM 00789) 149

J.F. Saluzzo, B. Leguenno and G. Van der Groen (Belgium)
Use of heat inactivated viral haemorrhagic fever antigens in serological assays (JVM 00790) 165

T. Böltz, R.-P. Hummel, W. Trûoger, H. Rübsamen-Waigmann, L. Biesert, N. Müller-Lantzsch, P. Koch, W. Bessler and G. Jung (F.R.G.)
Distinction between HIV-1 and HIV-2 infection using novel syunthetic lipopeptide conjugates as antigens in enzyme immunoassays (JVM 00791) 173

J. Husson-van Vliet and P. Roussel (Belgium)
Pepetting errors in viral titrations: a useful approach (JVM 00792) 183

J.T. van Oirschot, D.J. Houwers, H.J. Rziha and P.J.L.M. Moonen (The Netherlands, F.R.G.)
Development of an ELISA for detection of antibodies to glycoprotein I of Aujeszky's disease virus: a method for the serological differentiation between infected and vaccinated pigs (JVM 00793) 191

J.J. Treanor, H.P. Madore and R. Dolin (U.S.A.)
Development of an enzyme immunoassay for the Hawaii agent of viral gastroenteritis (JVM 00794) 207

P.D. Hodgkin, A.A. Scalzo. N. Swaminathan, P. Price and G.R. Shellam (Australia)
Murine cytomegalovirus binds reversibly to mouse embryo fibroblasts: implications for quantitation and explanation of centrifugal enhancement (JVM 00795) 215

M. Sigmund, H. Einberger and W.J. Neubert (F.R.G.)
Simple method for rapid and highly sensitive detection of antiviral antibodies in serum and cerebrospinal fluid of small laboratory animals (JVM 00796) 231

M.T. Montero, E. Ortega and B. Gómez (Mexico)
Detection of cell surface rubella virus antigens in Vero cells with *Staphylococcus aureus rich in protein A (JVM 00798)* *239*

M.A. Johnson and M.A. McCrae (U.K.)
A rapid and sensitive solution hybridization assay for the quantitative determination of specific viral RNA sequences (JVM 00800) 247

J. Vreeswijk, E. Folkers, F. Wagenaar and J.G. Kapsenberg (The Netherlands)
The use of colloidal gold immunoelectron microscopy to diagnose varicella-zoster virus (VZV) infections by rapid discrimination between VZV, HSV-1 and HSV-2 (JVM 00802) 255

R.E. Unger, R.Y. Chuang, R.H. Doi and B.I. Osburn (U.S.A.)
Comparison of dot-blot and Northern blot hybridizations in the determination of genetic relatedness of United States bluetongue virus serotypes (JVM 00803) 273

H.A. Fields, P. Bruguera, N. de la Torre, J. Puig and L.J. Anderson (U.S.A., Spain)
Purity, antigenicity and immunogenicity of the hepatitis B surface antigen purified by five different methods (JVM 00804) 283

H.A. Rotbart, M.J. Abzug, R.S. Murray, N.L. Murphy and M.J. Levin (U.S.A.)
Intracellular detection of sense and antisense enteroviral RNA by in situ hybridization (JVM 00801) 295

R.E. Kiernan, D.A. McPhee and R.R. Doherty (Australia)
Quantitation of infectious human immunodeficiency virus using a modified plaque forming assay (JVM 00805) 303

M.P. Landini, E. Rossier and H. Schmitz (Italy, Canada, F.R.G.)
Antibodies to human cytomegalovirus structural polypeptides during primary infection (JVM 00806) 309

G.M. Thiele and G.L. Woods (U.S.A.)
The effect of dexamethasone on the detection of cytomegalovirus in tissue culture and by immunofluorescence (JVM 00807) 319

A. Ruiz-Arguelles, S. Ponce-de-Leon, M. Presno-Bernal, A. Ponce-de-Leon, R. Ortiz-Lopex and G. Rojas (Mexico)
Increased detection of human immunodeficiency virus antigen carriers by simultaneous assay of plasma and extracts from resting and phytohaemagglutinin-stimulated peripheral blood mononuclear cells (JVM 00808) 329

D.R. Dahling and B.A. Wright (U.S.A.)
A comparison of recovery of virus from wastewaters by beef extract-Celite, ferric chloride, and filter concentration procedures (JVM 00810) 337

Y. Hosaka and T. Watabe (Japan)
Cryoelectron microscopy of vitrified Sendai virions (JVM 00797) (Short Communication) 347

G. Himmler, U. Brix, H. Steinkellner, M. Laimer, D. Mattanovich and H.W.D. Katinger (Austria)
Early screening for anti-plum pox virus monoclonal antibodies with different epitope specificities by means of gold-labelled immunosorbent electron microscopy (JVM 00799) (Short Communication) 351
